

COSMOS QUARTZ FAQ

◆ What is Quartz?

QUARTZ- is the second most abundant and naturally occurring mineral found in the Earth's Crust. Quartz is the fourth hardest mineral known to man.

◆ What is Cosmos Quartz?

COSMOS QUARTZ- is a perfect blend of the latest technology combined with the beauty and durability of Natural Quartz. This blend creates a final product performing as a superior and versatile surface.

◆ Does Cosmos Quartz come with a warranty?

YES WARRANTY- Your decision to purchase Cosmos Quartz is covered with an industry leading 10 year product warranty.

◆ Will Cosmos Quartz have variation in color from sampling?

YES- Color variation is intended and designed into many colors to enhance the aesthetic quality. Samples are small select cuts from a slab; they do not exhibit all the characteristics of a color. If you would like to view slabs prior to final commitment just contact your fabricator to do so. Cosmos Quartz is not a seamless product. Where there are seams the product pattern and shade can change.

◆ Can I cut directly on Cosmos Quartz?

NO- You will ruin your knives. Quartz is much harder than steel and should not be used as a cutting surface. You must use a cutting board that is appropriate for your cutting tools.

◆ What maintenance is required with Cosmos Quartz? Does it need to be sealed?

NO MAINTENANCE REQUIRED- Clean your Cosmos Quartz surface with a mild non-abrasive, non-bleach cleanser. That is it!

◆ What slab sizes and thicknesses are available?

LARGE SLABS- Cosmos Quartz offers slab sizes of 63" x 118", with thickness variations of 3cm or 1 ¼". Large slab sizes result in better project yield and job cost savings. Other thicknesses and tiles are available by special order.

◆ Where can I use Cosmos Quartz in my project?

ANY INDOOR APPLICATION- Kitchen Countertops, bathroom vanities, service counters, desks, shower accessories, flooring, etc...

COSMOS QUARTZ FAQ

◆ Is Cosmos Quartz heat resistant? Can I put hot pots directly on the surface?

YES- Cosmos Quartz is highly heat resistant.

NO- You cannot put hot pots directly on the surface. No countertop surface is completely unaffected by any kind of direct heat. You must use a trivet or hot pad to insure protection for any countertop surface from heated cookware.

◆ Is Cosmos Quartz food friendly?

YES, FOOD SAFE- Cosmos Quartz is non-porous, creating the ideal surface for hygienic food preparation and if properly cleaned it is virtually bacteria free.

◆ Why Cosmos Quartz?

OUR FAVORITE QUESTION:

- **Quality-** Our product is supreme. Compare Cosmos Quartz side by side to any other brand and we are sure that you will agree.
- **Service-** Cosmos Quartz is distributed through ten US Cosmos Granite facilities covering the entire US mainland. Backed by our international parent Company, Divya Shakti, Cosmos Quartz has the luxury of matching and manufacturing just about any quartz selection and successfully completing any cut-to-size project.
- **Price-** After reviewing our product, warranty, large slab size and service level, compare Cosmos Quartz' price to any other Quartz brand and you may wonder what they do with all that money.

QUALITY, SERVICE AND PRICE ; WHO SAID YOU CAN'T GET ALL THREE?
